

JOINT MOTION BY SUPERVISORS. SOLIS AND ANTONOVICH  
June 27, 2016

In light of the recent environmental health issues impacting residents who live near the Exide and Quemetco battery recycling plants, Aliso Canyon, and most recently, the Fruitland Fire in Maywood, environmental health oversight and monitoring has become increasingly important, in fact it is a priority.

**WE, THEREFORE, MOVE** that the Chief Executive Officer recognize Environmental Health Oversight and Monitoring as the fifth priority, along with Sheriff’s Department reform, Child Welfare System, Health Services Integration, and Homelessness, in the County governance.
